

ARMY **VANTAGE**

DATA ANALYTICS PLATFORM

The analytics platform for data-driven decision-making across the Army

WHAT IS ARMY VANTAGE?

A GAME-CHANGER FOR THE ARMY

Army Vantage is the Army's data-driven operations and decision-making platform, enabling Army users at every echelon and across classification levels to view comprehensive Army-wide data, analyze trends and make data-driven decisions.

WHAT DOES ARMY VANTAGE DO?

- Supports the Army's modernization and readiness priorities
- Displays past, current and future total force data
- Produces predictive analytics
- Empowers users at every level through collaboration
- Facilitates real-time or near real-time decision making

WHO WE ARE

- A tool to help the Army leverage data as a strategic asset
- An open and extensible data management platform that can integrate data from new or legacy systems in any form, at any scale
- A key component of PEO EIS's Army Data Analytics and Platforms (ARDAP) portfolio

MISSION

To empower all Army users with the ability to make real-time, data-driven decisions

FAST FACTS

Thousands of Army contracting officers leveraged Army Vantage in CY20 to recover an additional \$2 billion in unliquidated obligations over prior years – funds that could be redeployed to more pressing Army priorities.

All major Army commands used Army Vantage's COVID-19 COPs to view and analyze data on testing capacity and re-opening risks, enabling them to make informed strategic decisions.

CABILITIES & PRIORITIES

- **360-degree Unity of Legacy and Future Systems.** Integrate thousands of datasets and billions of records from every Army domain — including Readiness, Personnel, and Finance — into a single pane of glass, enabling users to draw connections across domains.
- **Decision Superiority.** Artificial Intelligence (AI) capable workflows unlock better decisions faster. Applications empower all user types, from Senior Leaders to Command teams and staff, to make data-driven decisions with near real-time data updates. No-code/low-code options meet users at their level
- **Continuous Priority Assessment.** Identify, scope and begin technical implementation of additional lines of effort in support of Senior Leader priorities of technical ability.
- **Interoperability & next-generation data management.** The platform automatically enforces data policies and standardization, while enabling users to quickly find relevant data using tags and cataloging features. Open Application Programming Interfaces (API) enable third-party integration with the platform. Data and code are fully exportable.
